# COLOR CODES FOR DISTRICT EVALUATIONS

April 1978

Building	Color	Integrity	Architectural Significance	Historical Significance
<b>PIVOTAL BUILDING</b> An intact building which has special visual merit or historical importance. Probably qualifies for listing as a single building.	Red	Exterior integrity excellent.  Retains historic appearance except for minor details.	Has special architectural significance due to style, size, rarity of design or rarity of building type.	Has special historical significance due to age, association with important persons or events.
<b>MATRIX BUILDING</b> A good vernacular building which retains an historic appearance.	Green	Exterior integrity good  Minor alterations are permissible	Has architectural significance as part of a grouping of vernacular buildings.  Retains architectural detail.	Has historical value as a contributor to the general area development.
<b>FILLER BUILDING</b> An old building which has had unsuitable alterations or sidings added.	Yellow	Exterior integrity poor but potentially reversible	Architectural significance diminished by loss of detail and use of modern materials which detract. Historic origin still recognizable.	Has some historical value as remnant of the area history of development.
<b>INTRUSION</b> A building of any age which detracts from the historic environment.	Blue		Lacking in architectural distinction. Intrudes upon the visual character of the streetscape as a disruptive element.	No historic value.
<b>MODERN BUILDING</b> Usually less than 50 years old. A recent building which does not detract.	Brown		Compatible in scale and materials with the historic environment. May have architectural distinction.	No historic value
<b>PARKING LOT</b>	Cross Hatch

# GRADE CODES FOR DISTRICT EVALUATIONS

April 1978

Building	Color	Integrity	Architectural Significance	Historical Significance
<b>PIVOTAL BUILDING</b> An intact building which has special visual merit or historical importance. Probably qualifies for listing as a single building.	Red	Exterior integrity excellent. Retains historic appearance except for minor details.	Has special architectural significance due to style, size, rarity of design or rarity of building type.	Has special historical significance due to age, association with important person or events.
<b>MATRIX BUILDING</b> A good vernacular building which retains an historic appearance.	Green	Exterior integrity good Minor alterations are permissible	Has architectural significance as part of a grouping of vernacular buildings. Retains architectural detail.	Has historical value as a contributor to the general area development.
<b>FILLER BUILDING</b> An old building which has had unsuitable alterations or sidings added.	Yellow	Exterior integrity poor but potentially reversible	Architectural significance diminished by loss of detail and use of modern materials which detract. Historic origin still recognizable.	Has some historical value as remnant of the area history of development.
<b>INTRUSION</b> A building of any age which detracts from the historic environment.	Blue		Lacking in architectural distinction. Intrudes upon the visual character of the streetscape as a disruptive element.	No historic value.
<b>MODERN BUILDING</b> Usually less than 50 years old. A recent building which does not detract.	Brown		Compatible in scale and materials with the historic environment. May have architectural distinction.	No historic value
<b>PARKING LOT</b>	Cross Hatch

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:

(Indicate if building or structure is in an historic district)

**Among residential, commercial and industrial buildings of S. Elmwood. Faces back of Federal Office Building. Within West Village Preservation District.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Two story Italianate Style with one story brick addition in front. Cross gabled roof. Scroll brackets under eaves. Segmental arch window openings and doorway in side section. Round arched window in front gable. All windows have stone sills.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1872

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**Typical Italianate Style house with modern additions. G.S. Hazard was the original owner when the address was listed as 144 Morgan Street, before the street name was changed to Elmwood. Hazard lived at 211 Delaware Avenue, and was a prominent businessman of G.S. Hazard and Company, which dealt in forwarding and commission.**

DESCRIPTION OF SIGNIFICANCE  
OF  
WEST VILLAGE PRESERVATION DISTRICT

ARCHITECTURALLY:

The 100-140 structures within the West Village are mainly of brick construction. The area developed in the latter half of the nineteenth century with the majority of the construction occurring between 1865 and 1885. The structures range from small workers cottages to large Victorian homes and include Italianate, Second Empire, Gothic, Shingle, Greek Revival, Colonial Revival and French Gothic styles. There has been virtually no commercial development in the area and there has been minimal bastardization to the original facades. Architecturally, the West Village clearly represents the architectural development of an affluent middle class community and contains many samples of the various architectural styles which came out of this period.

GEOGRAPHICALLY:

The West Village Preservation District, located on the lower West Side, developed as a result of the consolidation of the City of Buffalo and its neighboring community of Black Rock. Early in Buffalo's history Joseph Ellicott mapped out the radial street pattern of New Amsterdam which was later to become the City of Buffalo. The east-west street pattern which Ellicott plotted collided with the street scheme of Black Rock when the city annexed Black Rock in 1832. The result was a meshing of the two plans creating a triangular, pre-shaped neighborhood bounded by West Tupper, South Elmwood, Niagara and Carolina. The West Village's proximity to downtown, population growth, and industrial development made the area ripe for development by an upper class society who were looking for homes between prestigious Delaware Avenue and Niagara Street. Today, close to the downtown business district and the Waterfront, the Mid Victorian, tree-lined streets of the West Village provide an interesting living alternative for many professionals seeking homes as a "back to the city" movement is underway.

HISTORICALLY:

The unique community of the West Village created by the meshing of two distinct street patterns saw little residential development before the latter half of the nineteenth century, but a few stately mansions did exist. One particularly well known was "The Cottage". The elegant structure was owned by Dr. Ebenezer Johnson, the first mayor of Buffalo. Dr. Johnson was born in Connecticut in 1786 and moved to Buffalo at the age of twenty-three to establish a medical profession. In 1824 he purchased the entire block frontage on Delaware Avenue, from Chippewa Street to Tupper Street comprising some twenty-five acres, on which he built in 1828 and stood between what was to become the north and south roads of Johnson Park. In Martha Poole's book "Social Life in Early Buffalo" a description of garden parties given at the Cottage included acres of cultivated lawns, flower beds and numerous elms. The garden extended from Chippewa Street to Tracy Street and westward to Prospect Street, where fruit orchards, vegetable gardens and out-buildings existed. Dr.

Johnson became Buffalo's first mayor in 1832 when Buffalo was incorporated as a city. Dr. Johnson gathered considerable wealth in Buffalo until the economic depression of 1836. Dr. Johnson died on September 23, 1849 at the age of sixty-two.

In 1851, a group of residents of the city gathered to establish the Buffalo Female Academy, later the Buffalo Seminary. Grounds were acquired from the Johnson property and the "Johnson Cottage" was renamed, "Evergreen Cottage" and served as the residence of the school's principal. A new building, Goodell Hall was dedicated in 1852. This was located just north and south roads of Johnson Park. Charles West in "An Address of the Buffalo Female Academy at the Dedication of the Goodell Hall" in 1852, cited the attractiveness of the site in its isolated setting and its frontage on the park.

It was between the years 1850 and 1890 that significant development occurred in the West Village. The large parcels of land owned by Ebenezer Johnson, Stephen Whitney and others, were divided up into numerous smaller parcels. The economy of the Buffalo area shifted from agricultural to industrial. This industrial development along with population growth created a need for more housing. Prosperous families on Pearl, Swan and Ellicott Streets looked north for homes away from the growing factories. In 1851 the Johnson Park roads were cut through and homes were built around the mall. Prominent businessmen, professional men, steamboat captains and salesmen began to make their home in the West Village.

It was after the Civil War, around 1865, when Bronson Rumsey decided to build his home just a block away from Mayor Johnson's old estate. Henry and Edward Rose, architects from England, designed Rumsey Park and the Mansard Style house on what is now the grounds of school 76. This area was once the site of a pond where local children skated and played hockey in the winter. The small lake and swiss chalet boathouse were features of a private garden and park to the rear of Rumsey's Delaware Avenue home. The garden estate was cut by the construction of South Elmwood in 1912. The pond was filled in and paved over.

Most of the building in the West Village was completed by the 1890's with the exception of large apartment buildings. Middle class men like Christopher Cahmot, a custom bootmaker, specializing in "fancy and opera boots" made his home at 73 Johnson Park. George W. Johnston, a forman and decorator built his Italianate cottage at 106 Prospect Avenue. F.W. Taylor, one of the Prospect Avenue Baptist Church's first deacons, resided with his family at 56 Whitney. Charles Young a cabinet maker, owned a house at 92 Prospect. 61 Johnson Park was owned by Samuel Cornell, President of Cornell Lead Company, located at the corner of Delaware and Virginia. Lake Captain, Charles Hamilton, lived at 245 Georgia. 30 Whitney was owned by Lorenzo Sweet, a partner in the firm of Gethring and Sweet, Merchant tailors with a business at 238 Main Street. James P. Gethring, a partner in the firm, lived next to Sweet at 26 Whitney. Lake captains, bankers, tailors, clerks, cabinetmakers, conductors, ship chandlers, painters, meatpackers, secretaries, malsters and judges--all lived in West Village in the late 1800's. They were the pioneers who built the first homes and molded a community.

The turn of the century saw more industrial growth and immigration, which sent the population soaring. This brought an apartment Renaissance to the West Village. Several stately apartment buildings were constructed: The LaSalle, 273 Georgia; The Whitney; the Belmont, 35 Whitney; The Marguerite, 205 Carolina; The Columbia, 66 Whitney; The Algonquin, 75 Johnson Park; The Eberle, 222 Carolina; and The Lyndhaven, 49 Johnson Park. These buildings once provided spacious and elegant apartments for prominent Buffalonians, who could live near their work in downtown Buffalo. Spencer Clinton, son of former governor Dewitt Clinton, lived in the Algonquin. Actors, actresses and musicians lived in neighborhood apartments which were close to the thriving theatres that lined the lively downtown core.

1914 saw the opening of another addition to the West Village, Hutchinson Central Technical High School, then the new Hutchinson Central High School. The first public high school in Buffalo, then called Buffalo High School, was in danger of being closed because the building which housed it was no longer adequate or suitable or even safe for a large number of students. In 1909 Mr. and Mrs. Edward Hutchinson came forth and donated their homestead for the site of a new school. The spacious grounds on Chippewa Street and Whitney Place, 113,00 square feet, was the answer to prayer, and plans began for the construction of the new school. The name Hutchinson was added to the new high school and the original building was constructed in the shape of a "H". Since its construction, Hutchinson High School has evolved to become one of the foremost technical training centers in the City, Hutchinson-Central Technical High School.

The early 1900's also brought the development of residential neighborhoods in the area surrounding Delaware Park. Many second and third generation sons sold their parents West Village homes to the newly arrived immigrants, and moved north to what was country, as their fathers had before them. Larger families of limited means took control of Victorian properties, and additions and alterations were made to meet their needs. Property taxes increased, the depression struck, the cost of upkeep became an impossible burden. One large Victorian Villa after another was divided as a boarding house. (this paragraph is from the text of "Three Walks Around Allentown").

It was not until the 1960's that renovation efforts in the West Village began, when several townhouses were remodeled on Johnson Park. Since then, government programs and private financing have made extensive rehabilitation possible. In 1973, the dream of revitalize the lower west side neighborhood came closer to realization when ten turn of the century apartments and single family residence were built within the shells of former sub-standard rooming houses, while retaining the architectural integrity.

The West Village area has provided stimulating experiences and inspirations for many artists. Water colorist, Charles B. Burchfield created many exciting paintings of neighborhood houses while living on Whitney Place. At that time, Burchfield was working at Birge Wallpaper Company on Niagara Street. Photo-

grapher Milton Rogovin has earned a nation wide reputation for his documentary photographs taken in the lower West side. Captured in his photos are retired and working people, young and old, people of mixed ethnic and socioeconomic backgrounds.

(Indicate if building or structure is in an historic district)

Located on a residential street. Within West Village Preservation District.

18 OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

Two story Italianate style house. "L-shaped" floor plan with side entrance. Wood porch over entranceway. Round arched windows. Attic window in gable. Bay window on the first floor. Dentils under eaves.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION 1872

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE

92 Prospect is a well done example of the "L-shaped" plan Italianate Style residence that in the 1860's and early 1870's dominated a phase of building in this area. On a 1872 map, this structure and also 74 Prospect are shown to belong to a J. Smith. At this time, James M. Smith lived on the corner of Prospect and Georgia, (now that is a parking lot). It is quite possible that this J. Smith started housing speculation on Prospect Avenue. If this is the case, then James M. Smith can be included along with Miles Jones, Alonzo Tanner, and George W. Tiff as early West Village developers.

h. other: Prospect Avenue Baptist Church

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:  
(Indicate if building or structure is in an historic district)

*This structure fronts on the southwest side of Prospect Avenue between Georgia and Carolina Streets. On this side the majority of Victorian development occurred quickly from 1860 to 1872. While on the northeast side the development compares to Whitney Place*

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
*This structure was built in three separate phases. In 1871, the 2 1/2 story Italianate Style mid-section, with segmental arched windows and gable was built. In 1884, a three story Second Empire Style section with round arched windows, round hood dormers, "I" shaped chimney stacks, and half-circle transom over double wooden doors, was added to the front. In 1920, a rectangular, gable*

SIGNIFICANCE *roofed box was added to the rear.*

19. DATE OF INITIAL CONSTRUCTION: 1870

ARCHITECT \_\_\_\_\_

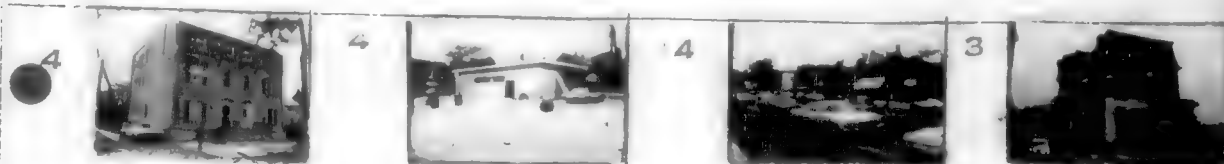

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

*This structure grew in three separate phases. After the turn of the century another brick addition was built, probably to provide more apartment space. Unique West Village structure because of combination of Italianate and Second Empire.*

**The LaSalle is a five story, 51 unit apartment building built in the Italian Palazzo Style. Its symmetrical design contains two identical sections that are situated at a 135 degree angle to Chippewa Street. They are joined by the entranceway which faces the corner directly.**

SIGNIFICANCE

19 DATE OF INITIAL CONSTRUCTION: 1896

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20 HISTORICAL AND ARCHITECTURAL IMPORTANCE

**The construction of the LaSalle Flats in 1896, marked the physical end to the Miles' Jones (and heirs) estate and the beginning of a new type of neighborhood on West Chippewa. In 1974, this structure underwent complete interior rehabilitation extending its usefulness to the elderly that live here. The first story employs rusticated stone. Chicago windows used on the 2nd, 3rd, and 4th stories. Stone quoins, Iron porches on the center of the 2nd, 3rd, and 4th stories of each apartment block. Terra Cotta relief designs between the 5th floor windows. Cornice with modillions and dentils.**

*Clipped gable roof with dormers. Windows and carriage door have segmental arches. Wood plank doors in carriage entranceway.*

#### SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION 1854

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE

*In 1854 this structure was the carriage house and possibly the servant quarters for the Miles Jones estate. Miles Jones, a pork inspector owned most of the land in the western section of the block bounded by W. Chippewa, S. Elmwood, Huron, Prospect, and Georgia Streets. He built his home, a mansion, on the corner of Georgia and W. Chippewa Streets. His home was located on the N.Y. State Reservation Line, when there was just open fields west of this line, later on he built housing for his relatives on the estate. Miles' Jones home was part of the prestigious W. Chippewa homes that were removed for apartment buildings and Hutch-Tech High School. One of few remaining carriage houses in this area. Unique in West Village.*

17 INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS

(Indicate if building or structure is in an historic district)

*The Roanoke is located on the S-W corner of S. Elmwood and W. Chippewa Streets. The surroundings include a mixture of commercial and residential structures, apartments, parking lots, and Hutch-Tech High School. Within West Village Preservation District.*

18 OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

*The Roanoke is modeled after the Italian Palazzo. The pedestrian level is rusticated by light and dark banding set on a concrete foundation. The second level takes in the second and third story and is separated by a masonry band between the first story and bracketed porches between the top stories. The second level is ornamented with round windows and polygonal two story bays. The top story contains wrought iron porches, masonry tracery over windows and ornamented brick parapet. 1901*

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION:

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20 HISTORICAL AND ARCHITECTURAL IMPORTANCE:

*In the 1880's S. Elmwood was called Morgan Street and came to a northern end at W. Chippewa Street. At the present site of The Roanoke the brick homes of George Barnum, Cornelia L. Seymour, and Laura A. Rathbone stood facing S. Elmwood. In 1901, the original section of the Roanoke was completed on the site of George Barnum's home and was originated facing W. Chippewa. Later, in the 1920's after S. Elmwood extended North of W. Chippewa, another wing and a entrance was built giving The Roanoke its "N" shaped plan we see. This structure is one of five hotels built for Mr. Roanoke, prior to the Pan-American Exposition of 1901, to provide rooms for the influx of visitors coming to Buffalo.*

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**The Henrietta was built on lots #28 and 31 of the original Stephen Whitney Estate. William Whitney, son of Stephen Whitney, quit claim on lots #28, #29, #30 and #31 to George Duchscherer, June 11, 1891. George Duchscherer was then responsible for the construction of the Columbia (86 Whitney), the Marguerite (205 Carolina), the Josephine (demolished, tot lot at present), and the Henrietta. All of these flats built between 1891 and 1894. They play a major role in West Village's "apartment renaissance" in the 1890's when the tide turned from single to multi-unit structures. Typical apartment building with Romanesque Revival Styling.**

PROSPECT AVENUE BAPTIST CHURCH

Ground was broken in April of 1881, and the cornerstone laid July 12, 1881 for the church. It took approximately one year for the structure to be completed.

The building is of red brick, trimmed with dressed reddish-brown sandstone. It is finished throughout in the English decorated Gothic Style of architecture. The tower stands diagonally at the intersection of Prospect and Georgia Streets. at equal angles to either street and is topped by a spire rising 170'.

The auditorium is in the form of an amphitheatre, the outerspace being used for halls and stairways. The broad gallery and the roof are supported by ten iron columns equally distant from a common center. The central ceiling forms a dome, springing from the imposts, with a base diameter of 57' rising to 43'. Surmounting the dome is a convex skylight of stained glass, 15' in diameter. The easterly transept, in front of which stands the pulpit, is used to house the baptisery. On the gallery above is placed the large organ from Johnson and Son, Westfield, Massachusetts.

17 INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS.

(Indicate if building or structure is in an historic district)

**The Columbia, turns corner of Carolina and Whitney streets. It stands amidst other structures of differing periods. Rooming houses, apartment buildings, and light commercial activities pervay in this section of West Village.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**The Columbia is an eleven unit, 3½ story brick apartment structure of the Romanesque Revival Style featuring: heavy massing of towers, chimney stacks, recessed porches, and steep roofed gables; brick roofline ornament on the fineal topped towers; chimneys that appear to be ornamented pillasters; around arches, flat headed, low arched, and polygonal bays offer a variety of forms for the entrance and window openings.**

19. DATE OF INITIAL CONSTRUCTION: **1892**

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**The Columbia, was built in the 1890's when apartment structures were built in profusion on any lots that remained open. The Columbia Flats, were finished in 1892 on two of the last lots still held by the trustees of Stephen Whitney. In the winter of 1974, the rehabilitation to the interior of the Columbia was completed. The integrity of the exterior remained intact. The designers of the Columbia used a carefully thought out Romanesque Revival Style instead of the current trends toward the American Commercial Style being employed in most of the other apartment buildings in the West Village.**

**46 Whitney, is a structure of late Victorian vintage on a street that depicts the development of Victorian Style from 1861 to 1898. Within West Village Preservation District.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Two large wooden brackets resting on brick corbels visually support the overhanging gable, at either end. Turned wood posts support the front porch. Carved wood double doors in entranceway.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION 1880

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**46 Whitney was built in a time when the Second Empire phase was nearing an end. This structure brought on a new thinking to residential building on Whitney Place. The combination of brick and frame living spaces was developed using the mansard roof, but in the 1880's, the designers employed Queen Anne, Stick, and Shingle Styles not only to change the appearance but to further the play of textures. This basic form of house building was the root of residential construction decades to come. Unique Queen Anne Style house in West Village with Eastlake porch.**

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE

**This modest Italianate house was built in 1861, for Lorenzo Sweet, an executive in the firm Gething and Sweet, a tailoring business. Eleven years later, Sweet's partner, James P. Gething built the mansard roofed 26 Whitney Place. Sweet's home was the first to be built (between Georgia and Carolina Streets) on what was then Palmer Street. The Italianate house used was typical for the next ten years on Whitney. Sweet's partner, Gething, built the first Second Empire Style residence on this block of Whitney Place. Not only were Gething and Sweet successful business men but pioneers on Whitney Place. Typical Italianate Style house.**

BUILDER: \_\_\_\_\_

20 HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**Originally, this land was possessed by Stephen Whitney and his trustees. Homer C. Sherwood, a clerk, was lucky to obtain this land to build his Italianate Style home. By dividing the facade into four parts instead of the typical three, this structure appears at the same time creating a different symmetry. Unique house in West Village because of wide, construction and fine styling.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: 1898 1898

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**Originally, the site of 35 Whitney was occupied by a brick residence built in the early 1870's for A.L. Schriver. A man by the name of Roanoke, foreseeing the need for housing visitors that would soon be coming to Buffalo to see the Pan-American Exposition, chose this site to build one of his five hotels. In 1898, 35 Whitney was completed, and pre-dated the Roanoke Hotel which gave the West Village area two of Mr. Roanoke's five hotels. Originally the name of the hotel The Piermont. Unique apartment building in West Village.**

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS.

(Indicate if building or structure is in an historic district)

**This apartment structure stands on Whitney Place which maintains a mixture of 1875-1885 brick Victorian residences and other apartment buildings built in the turn-of-the-century apartment boom. Two doors down is 65 Whitney, which is an exact replica of this structure. Within West Village Preservation District.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
**59 Whitney is a three story Italian Palazzo style apartment building containing six units. The windows and doorway on the first floor have splayed brick arches. Brick quoins. Wood paneled balustrade on roof. Bracketed overhang with dentil molding shelters doorway.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION 1898

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**59 Whitney was built in a decade when apartment buildings filled any lots not taken by private homes. E.J. Garvin, purchased the land from the trustees of Steven Whitney and was one of the last parcels of land that remained from Whitney's large land holdings in the West Village area. The ornamented brick facade stands to exemplify the mixture of housing that developed on Whitney Place. One of several Italian Palazzo Style apartment houses in West Village.**

**Italianate Style Apartment House. Brick dentils along the parapet. Lunette windows on the third story. Round arched windows on first and second stories. Segmental arched entranceways. Original double doors with glass panels on 106.**

#### SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: 1861

ARCHITECT, \_\_\_\_\_

BUILDER, \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**104 and 106 Johnson Park appear to be one structure, but historical information shows that not only were they separate structures built for different persons but built four years apart. The first, 106 Johnson Park, was built in 1861 for Daniel P. Harris, owner of his own livery. In 1865, 104 Johnson Park was built for Samuel D. Colie a lumber dealer. The two structures were built touching each other. This resulted in a book image facade with the only hint of separate construction seen in the discreet difference along the parapet dentils. Knowing past Buffalonians love for open space surrounding their living quarters, it is no wonder that this attempt at attached housing did not take hold in any other place in the West Village.**

(Indicate if building or structure is in an historic district)

**Building faces Johnson Park, a city maintained park. Within West Village Preservation District.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**The Algonquin, is a brick three storey apartment building of the Italian Palazzo Style. Rustication is performed on the first storey by dark and light brick banding. The H-shaped plan is tied together by a massive arched entranceway. Dark brick quoins visually support the edges to the dark brick banded parapet. The front windows are decorated with Beaux d' Art ornament and the basement windows are covered with wrought iron grillwork.**

**SIGNIFICANCE**

19. DATE OF INITIAL CONSTRUCTION \_\_\_\_\_

ARCHITECT: \_\_\_\_\_ 1894

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE.

**The Algonquin, was built in 1894 on the property obtained from Anna M. Hart. Ms. Hart built her home in 1863 and had Alonzo Tanner as a neighbor. Ten years after the Algonquin was built, the surrounding large residences were removed for Hutchinson Central H.S. thus changing the neighborhood atmosphere. The Algonquin is a more elaborate example of apartment buildings built with the Italian Palazzo as the model in a time of American commercialism.**

(Indicate if building or structure is in an historic district)

**Within West Village Preservation District. Among residential buildings of Johnson Park, a city owned green.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Original "L" shaped plan Italianate Style house with Queen Anne additions including a tower. Gable roof with returns. Dentils along front eaves. Flat headed windows have keystones on second story and pediment shaped heads with foliate relief pattern on first floor. Side entranceway enclosed in frame, shed roofed extension. Round arched window opening with oval window in side. Rounded three story tower with domical roof, hexagonal shingles in tiled**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION

**c. 1854**

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE

**18 cont'd story, dentiled eaves and stone belt course above second floor windows.**

**20. One of the earliest structures on Johnson Park. Unique building in Buffalo because of combination of early Italianate styling and later Queen Anne additions. The tower is unique in the West Village. The original owner was Samuel G. Cornell who was president of the Cornell Lead Works, which made white lead and lead pipe works at the corner of Delaware and Virginia. At that time Johnson Park was called Park Place and Cornell's address was 61.**

17 INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS.

(Indicate if building or structure is in an historic district)

*House faces Johnson Park, a city maintained park. Within West Village Preservation District. Among residential structures. Hutchinson Technical High School is across park.*

18 OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

*Second Empire Style. Round arched windows on second story and segmental arched windows on the first story, all contain decorative keystones. Mansard roof with round headed dormers and porthole windows in the tower section over the entranceway. Bracket-like modillions and dentils make up the cornice, wooden porch, double doors of carved oak with glass panels.*

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: 1870

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20 HISTORICAL AND ARCHITECTURAL IMPORTANCE.

*69 Johnson Park was built originally for a C.P. Chamont on land he purchased from Alonzo Tanner, a man who lived and owned property in several places around the West Village. In the 1920's this house was broken up for use as a rooming house. In the early 1970's it was reverted back to one family use. One of the best examples of Second Empire Style in Buffalo.*

THE CHAPTER HOUSE  
95 Johnson Park

The Chapter House was built in 1884 for the Graduate Association of the Buffalo Seminary. The Association was the first woman's organization to erect a building for their exclusive use. The building was built with the best materials and the most modern plans. The heating and ventilation system was quite advanced. The furnishings were elegant.

About 1894 the club split in ideology and a portion of it went on to form the Twentieth Century Club. The Graduate Association moved to new quarters and sold their building to the Women Teachers Association in 1895. This organization was formed in 1895 by thirty-six teachers under the leadership of Miss Mary A. Ripley. It was organized "to promote the welfare of the public schools, to cultivate a spirit of sympathy among the teachers, to improve the character of the work done in the schools, to develop the abilities and resources of the individual members, to create in the community at large a deeper sense of the dignity of the teaching profession and the importance of the interests which teachers represent". (Buffalo Evening News 1/14/46) The association was the first teachers' organization in the United States to own its clubhouse. The teachers remained at this location until 1946 when they sold the building to the Greater Buffalo Foreign Service Veterans.

Later the building was used as a church.

- 20 HISTORICAL AND ARCHITECTURAL IMPORTANCE

Tracy Street was named after Albert Hallar Tracy and was opened in 1838. Mr. Tracy was one of the youngest men seated in the House of Representatives. He was 24 and ran on the Whig ticket. Thirty years later a developer by the name of George W. Tift bought many lots on Tracy and built brick houses facing a park owned by Bronson Rumsey. The residents of Tracy at this time were typically canal seaman and their families. George Tift, selected a simple non-ostentatious design for his brick plan-book houses. The remaining "Tift Homes" are 42, 54, 56, 58, 62, 64, and 90 Tracy Street. They exemplify the developers treatment of mass housing in the 1860's and 70's

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS.

(Indicate if building or structure is in an historic district)

*63 Tracy is located in the midst of duplexes of the same origin in desperate need of rehabilitation, and the "Tifft Homes". Across Tracy is the playground of Public School #76. Within West Village Preservation District.*

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

*68 Tracy is an example of duplex development of a period when home sometimes tended to be mass produced to fill city housing needs. Porches, bays, and other additions were attached to prevent obvi monotony.*

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: 1910

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

*Tracy Street was developed by a working class, (craftsman and canal seaman living in "Tifft Homes"). When the park of Bronson Rumsey was developed, there was no longer a need for the wealthy Johnson Parkers to hold on to their Tracy Street frontage. The lots were sold and housing was built, with the result being wood frame housing that seems a bit out of place, but still part of West Village's heritage of putting the workingman in houses on Tracy.*

Thirty years later a developer by the name of George W. Tift bought many lots on Tracy and built brick houses facing a park owned by Bronson Runsey. The residents of Tracy at this time were typically canal seaman and their families. George Tift, selected a simple non-elaborate design for his brick plan-book houses. The remaining "Tift Homes" are 42, 54, 56, 58, 62, 84, and 90 Tracy Street. They exemplify the developers treatment of mass housing in the 1860's and 70's.**

**Within West Village Preservation District. Among residential commercial buildings of Carolina Street.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**The Eberle, is a six-unit, four story apartment building featuring three story polygonal bays terminating into a dentiled overhanging cornice, Chicago windows offering the view on the Whitney facade, a pedestrian level that contains a round arched entrance.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION 1891

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE.

**The Eberle was built in the 1890's, when apartment structures were built in profusion on any lots that remained open, or in the case of the Eberle, on a lot that was formerly occupied. The Eberle, was built on the site vacated by G.N. Williams and Tucker. The Williams-Tucker building is thought to have been a livery stable built in the 1860's. This structure was removed and the Eberle was built in 1891. In the Spring of 1974, the interior was rehabilitated leaving the exterior intact. Typical apartment house with Queen Anne Styling.**

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS.

(Indicate if building or structure is in an historic district)

Garden Street is a one block alley with scattered houses and many garages serving West Avenue and W. Tupper Street houses. House sits close to street. A garage connects 35 Garden Street to 216 W. Tupper.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
 Two story Italianate Style with gabled roof. Four light, double hung windows, with stone sills throughout. Round arched windows on second floor and segmental arched windows on first floor. Segmental arched doorway with wood paneled door. Exterior chimney on NW side towards rear.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION c. 1888

ARCHITECT \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

Only brick house on Garden Street. Typical example of Italianate Styling found in Buffalo. Unusual in being connected to house fronting on W. Tupper.

294-296 Carolina Street

Originally owner, Asher P. Nichols, was born in Vermont, 1815. He attended the Springville Academy in 1834, later traveling to Canandaigua where he became a clerk in the law office of the Hon. George W. Clinton. In Judge Clinton's Buffalo law office, Nichols completed his legal studies and after his admission to the bar became the Judge's law partner. He was a member of the Buffalo Young Men's Association.

In 1867 he was elected state senator as a democrat. In the senate he was a prominent member of the Committee on canals. In 1870 he was appointed by Governor Hoffman, State Comptroller. He ran unsuccessfully for Congress in 1874, but was appointed one of the original trustees of the Buffalo State Asylum for the Insane, and at the time of his death was Chairman of the Executive Committee of that Board. He was survived by his wife and brother. He died May 30, 1880, age sixty-five.

17 INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS

(Indicate if building or structure is in an historic district)

Among frame houses of Carolina Street. Near corner of W. Tupper and Carolina. No other apartment buildings of this size in this section of Carolina Street faces rear playground of Public School #76 which faces on Elmwood Avenue.

18 OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
Three story brick and stone apartment building. Flat roof. Corbeled cornice. Three bays, all three stories high. One is on NE side. The other two are in front section with one projecting pavillion. Stone lintels over flat headed, single light, double sash windows. Brick banding below first floor windows. Recessed geometric patterned brick bands around second floor. Squared columns support entranceway porch. Rusticated stone basement story. Basement entrance in

**Residential**

161 Whitney Place

Original owner, Frank G. Gallagher was a partner in the firm Douglas, Gallagher and Clark, Railroad, Canal and Harbor contractors with offices at 57 Louisiana Street. Gallagher fell to his death at an excavation site at Buffalo Creek between the Ohio Street bridge and blast furnaces, July 20, 1870. Gallagher was fifty, born in Sligo, Ireland in 1821. He came to the United States with his parents when he was fifteen.

In 1867 he was the democratic candidate for State Prison Inspector, and at the time of his death had the position of superintendent of the Western Division of the Erie Canal. He was a widower, leaving a family of two sons and four daughter. BCA describes him as perseverant and enterprising.

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS:

(Indicate if building or structure is in an historic district)

Among mostly frame one and two story residences of Whitney Place.  
 Similar structure is next door at 175 Whitney.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

One and a half story frame cottage. Steep pitched gable roof. One story gabled roofed extension in rear. Front porch has pediment over steps with shingles in tympanum, and square columns, flat headed windows with a three section window on first floor.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1884

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

George H. Young, a conductor for N.Y.C. and St. L.R.R. was the original owner. A typical cottage built for a workman's family. A steep pitch roof gives this house its distinction.

(Indicate if building or structure is in an historic district)

Among residential and commercial buildings of Virginia Street. One of the largest apartment buildings on Virginia Street.

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):  
Three story apartment building with much cast-iron detailing. Flat roof. Projecting cast-iron cornice with modillion-like brackets under eaves. Stone quoins. Two pavillion sections flank central entranceway. Pavillions have two story cast-iron bays. Bays decorated with swags below second floor windows and by geometric relief pattern below third floor windows. Smooth stone keystones, voussoirs, and sills on flat-headed windows. Central entranceway is under cast-iron canopy with

19. DATE OF INITIAL CONSTRUCTION \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

18 cont'd scroll-like brackets. Wood paneled double doors with flat headed single lights. Egg and dart molding over door. Transom has leaded glass and is inscribed "Virginia Manor" sidelights with wood paneled lower section. Horizontal projecting brick bands on first floor. Side facing Tenth Street has same bays and entranceway treatment as Virginia Street front.

20. Unique apartment building because of fine cast-iron detailing. Finest apartment building in Virginia Street.

105 West Avenue

Original owner, Peter A. Porter was a historian, and prominent figure for many years in the Niagara Frontier region. He was born October 10, 1853 in Niagara Falls, when the place was a village. His father was Colonel Peter Porter, who lost his life in the Civil War. His grandfather was General Peter B. Porter, who lived in Black Rock and was a former United States Secretary of War. Porter was educated in St. Paul's school, Concord New Hampshire and Yale graduating in 1874, Married Alice Taylor, 1877. Porter was elected to Congress, defeating 34th district Rep. J.W. Wadsworth in a hotly contested campaign. He served in the Assembly in 1886 and 1887, representing the 2nd district of Niagara. He introduced and sponsored the first bill ever passed at the State capitol fostering water power development of Niagara. Helped organize Niagara Falls Power Company.

Porter was the President of the village of Niagara Falls in the 1880's and owner of the Cataract House, a hotel that was internationally renowned. Porter was the owner of the Niagara Falls Gazette in 1893 when the newspaper became a daily. He was president of Cataract bank, and owner of the Arcade building at the Falls, and was active in organizing the Niagara Frontier Landmark Association, which has placed many markers and tablets along the frontier.

In 1923, Porter was guest of honor at the 50th anniversary of his class graduation and at that time recalled how he had been Captain of the football team at Yale. Porter died December 16, 1925, leaving a wife and three sons-Porter also owned apartments in the Stuyvesant Apartment Building on Elmwood Avenue.

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION c. 1870

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

The original owner, John E. Locke, had a flour and feed business at 63 East Seneca Street. Typical brick house with Italianate Styling found throughout Buffalo. John Locke was a Buffalo builder, contractor and Businessman. He was born at Fitchfield, England, 1-18-1810, learning the trade of a mason. He married in 1832, and came to the US the same year. He entered a partnership with his brother Charles for twenty years. Locke's son later became his business partner. Locker was also a member of the well-known firm Benson and Locke, lumber dealers on Ganson St. Among the many large structures Locke contracted and built were the old commercial block, foot of Main St. St. Paul's church spire and the Courier's fire-proof building on Washington. Locke was survived by three sons. He died March 1884.

"FIRST FREE METHODIST CHURCH"

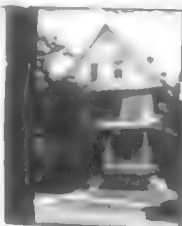

17-21

The "First Free Methodist Church" was originally organized in 1861. Its name at that time was the "Second Free Methodist Church". In 1869, the name was changed to "The First Free Methodist Church". Its first location was on Pearl Street, second location being at Virginia and Tenth Street. The present site is at Florida and Jefferson Avenue, where the congregation moved in 1921.

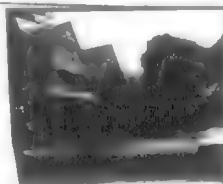

"The Free Methodist Church" has its origin in the Genesee Conference of the Methodist Episcopal Church, in 1850, in the state of New York. The movement for this organization was led by ministers who felt strongly that the Methodism of their time had departed in no small degree from its primitive standards of faith, experience and practice. The publication of articles by these men led to the arraignment of their leader who was declared guilty and expelled from the church on the charge of contumacy. Other prosecutions and expulsions, on similar grounds, followed in quick succession, resulting in appeals and controversies which finally resulted in the organization at Pekin, New York in 1860, of the Free Methodist Church.

Around 1926 the building served as a gym club. Today it houses the Puerto Rican Community Center.

40 Cottage Street

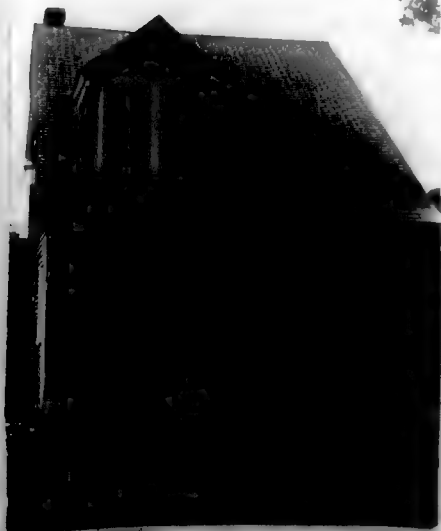

20-4

This one and a half story cottage has a much earlier construction date than the main house which fronts on Cottage Street. Keep Alley, a narrow alley with scattered garages and houses runs directly behind the house.

Architecturally, the houses has styling derived from the Queen Anne Style. Gable roof. Frame construction with clapboard siding. Front wood paneled double doors with each sash having a border of small square and rectangular stained glass lights. Gable roofed dormer. First floor windows have carved pilasters, and carved geometric design above windows. Porch has wood paneled balustrade and tapered posts. Porch is influenced by the Bungalow Style and was added later probably around 1920.

Date of Initial Construction: c. 1880

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

*The Thomas Coatsworth Mansion is done in the Second Empire Style and incorporates a four story tower. The house is dressed with stone window caps and corner quoins, detailed with Eastlake carvings. It was built by Thomas Coatsworth for his Silver Creek bride bride, Electra. The family coat-of-arms appears in a stone relief over the doorway. During the years 1920-1925, the house served as a cloistered monastery of the Carmelite Nuns.*

### Coatsworth Mansion

Thomas Coatsworth made his fortune in the shipping and elevator business that prospered in Buffalo after the Civil War. His father was from England, first settling in Ottawa, Canada. He later moved to Cheektowaga where he had a farm. Thomas moved to Buffalo as a young man and owned two or three thousand acres of land on Grand Island. He sold fuel to the steamboats before the days of coal. Later, he had a coal yard too, and owned several lake vessels. One was called the "Plymouth". He had one of the earliest grain elevators in Buffalo, being a pioneer in the great grain trade down the lakes and through the Erie Canal. Two grain elevators in the harbor bore his name. The first was sold sometime after the lake business had outgrown it, while the second one was used for only one season before his death.

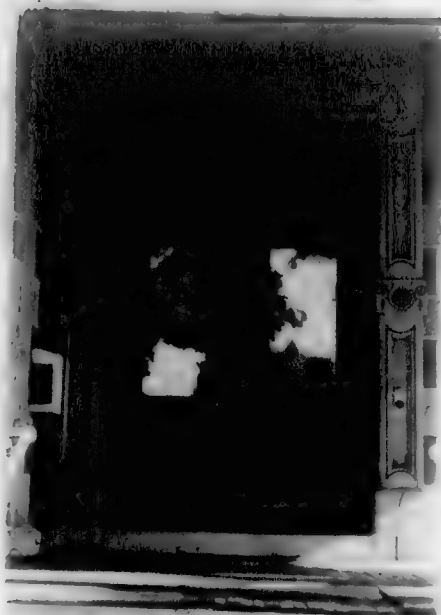

Thomas Coatsworth built his house at 49 Cottage Street in 1879, and built the neighboring Shingle Style house at 55 Cottage Street for his newly married daughter in the 1880's. His son William Coatsworth carried on the business selling his father's home and building another Shingle Style house for himself on Soldier's Place. Thomas Coatsworth died December 8, 1887.

The Coatsworths were descended from the Norman Blunts, and during the War of the Roses were followers of the Nevilles and like the Pinkneys, entitled to carry the Neville coat-of-arms. The coat-of-arms had a coronet and griffins head. Various branches of the family who lived in small manors made their fortunes or their fame in Newcastle or London as captains and commanders of ships of the Royal Navy. But the Coatsworths who remained in the lovely Teesdale Valley were simple farmers with more use for a spade than a coat-of-arms. Thomas Coatsworth was a descendant of the farmer side of the family.

Thomas Coatsworth also built the Coatsworth slip in Buffalo's harbor, and donated the land to the city for Ganson Street and gave the right of way to the Buffalo Creek Railroad.

(Indicate if building or structure is in an historic district)

**Within Allentown Preservation District. Located on one of two residential parks in Allentown this one with middle-class housing that has deteriorated for the most part.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Two story frame with gable roof. One story gable roofed extension to the rear. Segmental arched two over one light windows with plain surrounds. Front porch has squared columns and spindle balustrade. Floor-to-ceiling windows on first floor. Plain corner posts.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1870

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**The original owner was Lafayette Richards, a bellowsmaker. Originally 69 Clifton Place before the name was changed to Day's Park in tribute to the family that donated the center green to the city as perpetual parkland. One of the earlier buildings on the park the styling is plain. Landscaping by Frederick Law Olmstead has been destroyed.**

(Indicate if building or structure is in an historic district)

*Faces Day's Park. Within Allentown National Register and local historic preservation Districts. One of three endangered buildings next to each other on the park. Residential neighborhood with houses in poor to good condition. An alley runs behind the property.*

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

*Two and a half story Queen Anne Style. Gabled roof with slate tile. Two pedimented dormers have fish scale shingles, modillions, and single window openings. Conical roofed turret at southeast corner. Modillions and scroll brackets in second floor eaves. Rounded bays in second floor have transomed windows. First floor bays have paneled aprons. Center entrance has brick voussairs. Front porch has modillions in eaves, center pediment and ionic columns on Medina sandstone bases.*

19. DATE OF INITIAL CONSTRUCTION

ARCHITECT: \_\_\_\_\_ c. 1896

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

*Good example of the Queen Anne Style as it was adapted to multifamily buildings in Buffalo. One of the later buildings to be built on Cottage St. Cottage Street is the western boundary for the Allentown Preservation District. Its angular layout is the result of the merging of the Village of Black Rock's street plan and the grid pattern of Joseph Ellicott's street plan for Buffalo. Directly across the street is Day's Park which is one of the three parks that was laid out before Frederick Law Olmsted's park plan was implemented. Day's Park was donated to the city as perpetual park land in 1854 by Thomas Day. The land surrounding the park was eventually subdivided and developed. This building forms an important part of the streetscape surrounding the park as it can be viewed from the Allen Street end of the park. While Day's Park was not laid out by Olmsted, he was called in by the city to landscape the park after he had finished his park plan for Buffalo. The circular sandstone plantings and walkway at the west end of the park were laid out by him. This building is an important part of the development of Day's Park and is a unique example of architecture surrounding the park.*

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

*see attached sheet*

**Sources:** Buffalo City Atlas 1872  
 Buffalo City Directory 1866, 1869  
 Annual Park Reports, City of Buffalo  
 Buffalo Daily Courier, 5-2-1882

**Theme:** Residential, Second Empire Style

23-33  
126 Cottage Street

20.

Good example of the Second Empire Style as it was built in the City of Buffalo. One of the first houses to be built on the land surrounding Day's Park. The house was originally owned by George C. Dakin, who was an agent for the Anthracite Coal Co. with offices at 221 Main Street, and a coal yard at the foot of Genesee Street. George Dakin originally owned all the land from 114 to 134 Cottage Street. (The present building at 118 and 120 Cottage stand on this property.)

George Dakin was practically the founder of the coal business in Buffalo and did much to advance the traffic relations between Buffalo and coal producing points in Pennsylvania. George Dakin was born on January 10, 1815 in Concord, Mass. He was a descendant of a family that settled in the Massachusetts Bay Colony shortly after the Mayflower. In 1837 he commanded a mail, freight, and passenger steamer on Seneca Lake. Over the next 15 years he commanded in turn all the steamboats built by the company, including the famous Ben Loder. The Ben Loder was named for the President of the Erie Railroad Company. In 1841 he married Charlotte Brown of Albany. After the railroad killed the shipping business, Dakin devoted his time to the study of the coal business and engaged in the trade, starting in Geneva and receiving the first ton of coal ever sent directly from Scranton, Pa. to Geneva. After the Delaware and Lackawanna railroad was opened and operated three or four years, Mr. Dakin sold out his coal business and began farming on an extensive scale. In 1859 he accepted the position of agent for the D.L. and W Railroad. In the winter of 1861 he was sent to Buffalo to locate yards for shipping the coal. He acted in this capacity until his death in 1882. He lived at 124 W. Mohawk Street before he moved to his Cottage Street home.

Cottage Street is the western boundary for the Allentown Preservation District. Its angular layout is the result of the merging of the Village of Black Rock's street plan and the grid pattern of Joseph Ellicott's street plan for Buffalo. Directly across the street is Day's Park which is one of the three parks that was laid out before Frederick Law Olmsted's park plan was implemented. Day's Park was donated to the city as perpetual parkland in 1854 by Thomas Day who operated the City's first brick kiln. The land surrounding the park was eventually subdivided and developed. This building forms an important part of the streetscape surrounding the park as it can be viewed from the Allen Street end of the park. While Day's park was not laid out by Olmsted he was called in by the city to landscape the park after he and finished his park plan for the city. The circular sandstone area and walkway were laid out by him.

### 342 Maryland Street

Originally built as a chapel for the Church of Christ. The Church of Christ in Buffalo was established at a meeting held in the French chapel on the corner of Ellicott and Tupper Streets on February 20, 1870. There were thirty original members. For about two years the society, though without a regular pastor, held services once a week in the chapel. On April 13, 1872. A.J. Briggs, J.H. Grove and Brightman Taber were elected trustees.

The lot on the corner of Cottage and Maryland Streets was immediately bought and a chapel costing with the lot, about 6,000 dollars erected. The dedication took place November 28, 1872. The first pastor, F.M. Kibby of Kentucky, began his ministry in February 1872, and remained about three years. He was followed by O.G. Hertzog. His pastorate lasted but a year. In June, 1876, G.L. Wharton was called to the pastorate; resigning July 15, 1882, he was succeeded September 1, 1882 by the pastor J.M. Tribble. In 1884 the membership of the church was 175. In 1886, a new church was erected at Richmond and Bryant and the old chapel was sold.

In 1890, a Mr. and Mrs. Leander W. Hall lived in the building. Mr. Hall was a roofer with his business located at 57 Niagara St. In 1910 three wooden residences were erected on the original Church of Christ plot that extended to the corner of Cottage and Maryland Streets.

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE

**Originally owned by Mrs. George B. Walbridge who came to Buffalo with her brother Augustus Colson in 1831. Her maiden name was Wilhelmina L. Colson. She married in 1836. She and her husband were among those who broke off from the First Presbyterian Church to organize the North Church. Mr. Walbridge was a ruling elder and first superintendent of its Sunday School. He died in 1852. Mrs. Walbridge also owned 142 Cottage Street, but never resided at either address. However, her son, Charles E. lived at 142 Cottage and had a hardware and house furnishing goods store at 297-301 Washington. Italianate Styling dominates the structure but Queen Anne Styling is evidenced in the shingled roof which was a later addition.**

17. INTERRELATIONSHIP OF BUILDING AND SURROUNDINGS

(Indicate if building or structure is in an historic district)

**Originally was the site of the Fargo estate that spanned two and a half blocks, including the entire block between Jersey, Pennsylvania, Fargo and West Streets.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Two and a half story frame. Gable roof. Front porch has double pediment, with lattice-work in tympanum. Square supports, round arches and elaborate cut-out pattern in balustrade. Double door. Tall first floor windows, double hung with two over two lights. Gable bay on second floor has flat headed windows. Bargeboard. Gable roof has pair windows.**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION: c. 1892

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**Typical frame building built for a middle class family. Originally site for home of the Victor Baron, William G. Fargo. Founded the express agency, Wells, Fargo and Company. A first link in that cross country network ran from Buffalo to Detroit. From 1861-1895, William Fargo served as Mayor of Buffalo between 1867-1872, he built a colossal mansion on a five acre site at a cost over \$500,000. The door knobs were silver and gold. Ulysses S. Grant was an honored house guest. Fargo died August 3, 1881. The house stood vacant after 1890. In 1900 the mansion was demolished for a subdivision development. Carriage house converted to apartments c. 1920.**

21. SOURCES:  
**Buffalo City Sanborns, 1936**  
**Betty Welch, oral history tape**  
**THEME: Music Hall**

20. Unique building in the city of Buffalo. Mr. and Mrs. Kleinhans donated the land that the music hall was built on because there no fine music hall in the city at thet time. Eliel Saarinen was commissioned to design the the building and he and his son visited Buffalo many times until it was completed. Kleinhans is considered to be one of the top music hall acoustically in the country. It is of fireproof construction with steel frame, concrete floors and roof, curtain walls, suspended ceiling and is air coniditoned. The Buffalo Philharmonic Orchestra performs here along with other muscial groups.

## FIRST PRESBYTERIAN CHURCH

### I. ARCHITECTURE

#### a) The Tower: 163'

From the East, the roof lines the narthex, the small tower and the nave all lead upward toward the tower. Eastern slant matched with western slant of chapel roof. Ribs of the conical, copper roof at the crossing, which shields the dome, follow same rooflines. Solid mass of chapel braces its foundation.

#### b) The Exterior

Entrance door at ground level, shadowed by four arches of the porch. Porch is a shallow, Romanesque cloister. Also the strong horizontal line that connects the chapel to the Eastern building, that houses a north Wadsworth Street door and a part of the narthex. The interlocking of irregular buildings, makeup the facade contributing to the impression of a large church. The balustrade of the porch is built in as far as the window frame. The heavy transoms of the north window echo horizontal lines of the balustrade.

The upper part of window ranks in importance over the lower as it is partially concealed by the balustrade. The Upper part enhanced by a stone 3 stone borders, the outer ones ending in a carved stone boss. The whole treatment of the window (and the similar chapel window) lends a pattern of curves in the middle of a sharp gables and the two towers.

The course of red-brown Medina sandstone anchor the building closely to the ground the base stones are only slightly larger than those above. The resulting stability adds to the closely knit character of the facade.

One detail of interest in a French Romanesque cloister is the carving of the capitols of the columns. In the First Presbyterian there exists a foliated pattern of a vine on the captiols. In the center of each is head of a cherub.

#### c) The Interior

An unbroken line is the main attribute of the tunnel vault, this is typical of Byzantine architecture, it is also part of Romanesque architecture.

The dome is 65 feet above the floor, supported by four pendentives these spherical triangles are the traditional features that enable a round dome to fit over a square crossing.

The green marble columns at gallery level are a part of the supporting corners of the crossing. The use of pairs is a unifying motif in the whole interior.

East and West transept windows are high under the vaulting, the three tall lancets start well above the gallery. The choir gallery extends beyond the sanctuary proper, over the entire narthex, to the stained glass window in the north wall. The back wall consists of leaded glass panels in a simple quarried pattern.

The gold nave vault has a clear flowing line with only two interruptions, the shallow supporting ribs. There are no windows in the side walls of the nave, except the three, small openings

the height of each column is 16. The heavy forest block spreading above each column is typical of the period. Two of the capitals are derived from St. Mark's Cathedral in Venice: the modified Corinthian column on the aisle balconies and the finely incised capitals of the first floor colonnade.

In each transept there are metal tie rods, spanning the vaulting and joined midway in an ornamental boss. There were familiar in the architecture of Gothic and Renaissance periods.

There are three large chandeliers and unusual hanging lamp in the chancel. The chandeliers are almost copies of the chandeliers in Sancta Sophia. The choir window was installed in 1925. The stained glass is in the style of the art glass period. The window is signed in the lower right corner "L.C. Tiffany" (Louis Comfort). The three lancets in the west aisle are not signed by L.C. Tiffany but they have many characteristics of his early twentieth century work. It is generally assumed the three east window also originated from L.C. Tiffany though no signature is apparent.

## II. HISTORY

The First Presbyterian Church is not only the first religious body in Buffalo also the main stem from which branched many of the other denominational churches as the city grew.

In the late 1870's the congregations residential neighborhood on Church Street began to change as businesses crept up from the harbor. There was a period from 1879-1888 in which there was discussion over merger with another church (Calvary Presbyterian Church) or refurbishing the old building, no consensus could be reached. One faction which desired to stay downtown instigated a civil suit, based on the contention that the land originally given by the Holland Land Company was intended for church use only and could not be sold for secular purposes. The case concluded January 12, 1883 with the stipulation that "the petitioner is authorized to sell its said real estate for a sum not less than \$150,000."

Between 1883-1888, Mrs. Trueman G. Avery offered to give the church the vacant land on the Circle, directly across from her home (the present day site of Kleinhans Music Hall).

Ground was broken in May 1889 for the new church. There was no cornerstone ceremony in fact there is no cornerstone to be found. The chapel was the first part finished in 1889 and the first public service was held in December 1891. First communion as celebrated one week later. Reverend S.S. Mitchell, D.D., presiding.

The original architect was Edward B. Green. His work and influence in Buffalo architecture covered a span of sixty-seven years (1883-1950). Mr. Green was also the architect for the Parish House built in 1826 at this time he rebuilt the narthex.

The structure remained unchanged from 1889-1957. In 1957 structural changes were made to open up and enhance the chancel for modern Presbyterian worship and to improve the lighting and acoustics. This was accomplished in two parts one in 1957 and one in 1968. The chancel was dedicated on May 26, 1968.

SOURCE: THE BUILDING OF A CHURCH AN ARCHITECTURAL STUDY:  
1889-1973

Elizabeth Armstrong

20. Outstanding example of Gothic Revival Style church found in Buffalo. The First Free Baptist Church originally was located on Niagara Square but sold this church to the Congregationalists and built 224 Hudson in 1881. The church was located here until about 1910 when it was sold to St. Paul's Hudson Street Baptist Church. Around 1923 it was sold to the Chiesa Cristiana Italian Church when this area was populated by immigrant Italians. It presently houses the Missionary Pencoatal Church Inc. which has a congregation of mostly Puerto Ricans who now populate the neighborhood.

(Indicate if building or structure is in an historic district)

**Among residential houses of Jersey Street which are mostly Queen Anne Style. Church across street at NE corner. Deli diagonally across street on SE corner.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Three story Second Empire Style firehouse. Straight sided mansard roof with hexagonal slate tile. Pedimented dormers with paired windows, patera motif over some windows. Modillions under eaves. Second floor has series of nine brick pilasters with stone capitals with scroll and foliate pattern, paired windows have pediment like stone heads with foliate carvings, and modillions.**

**SIGNIFICANCE First floor has stone cornice with triglyphs, brick**

19. DATE OF INITIAL CONSTRUCTION: c. 1873

ARCHITECT: \_\_\_\_\_

BUILDER: \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**18 cont'd pilasters with stone capitals having foliate carvings. Three large garage doors. East side has segmental arched second floor windows and round arched first floor windows.**

**20. Unique styled firehouse in the City of Buffalo, Engine # 2 is one of the city's oldest operating firehouses. It was built on the site of the first Jersey Street Methodist Church. In 1917 the firehouse burned and just a brick shell remained. The firehouse was rebuilt and still operates today.**

21. SOURCES:

**Allentown Walking Tour p. 22  
 Buffalo City Atlas, 1872, 1884**

18. The Buffalo Fire Department became a paid department in 1880. Prior to this time the fire protection was provided for by volunteer companies with names like Liberty, Neptune, Vigilant, etc. So this is hard to determine the location of these stations and I doubt if this particular station was a volunteer company. The official records begin the next fiscal year and Engine #2 appears at its present location of the corner of Jersey and Plymouth. So one could assume that this firehouse was built around 1880-81 at this time (1880-81) there was a single building housing one house drawn steam engine. There was no ladder at this location until some years later. Sometime around 1885-86 this building burned down, no information can be found on this fire, but I have found reference made to the fact that in June 30, 1886 the Engine 2 house was reopened after rebuilding. The west side continued to be built up and the need for a ladder became urgent. In 1897, July 1 Hook and Ladder #9 was put into service in its own building beside the engine on the corner of Jersey and Plymouth at this time there were two separate buildings at this corner and the individual walls can be still seen. There were two entrances for people to walk through and each building had separate stalls for the horses, hay mows, sleeping quarters and other services, nothing was shared. Sometime around the turn of the century the two buildings were joined together and the building remains basically the same today as it did then.

The land survey for both buildings dated 1897 was for a piece of land measuring 60X126.5. The one building occupies this same parcel today. Starting in the basement the foundation is of white stone possible limestone the ladder side being longer than the engine side. The basements are on either side up by the original walls and are broken up by heavy lines which were coal lines before the introduction of gas furnaces. Floors were originally wood and a unique feature was a pit where the engine and ladder could be worked on from the basement. Moving up to the apparatus room, the rooms on either side of a long stairway to the sleeping quarters, where the ladder and engine are kept are fairly plain. The fir for the equipment is tight but adequate, the ceiling is a fine embossed pattern ceiling in good repair, the walls are brick and the floor concrete, a small watch desk is located in the front of the building between the engine and the truck. This watch area contains the telegraph system and the boxes services by the two companies are located here. The stable area of the ladder company is a kitchen today and the stable area behind the engine is used for recreation.

The stairway leading to the second floor is a straight wooden stair going from the front of the building to the rear. Here are contained the sleeping quarters and bathroom facilities for the men of each company. The floors are wooden, the ceiling tin, the bathrooms are nicely done with large slabs of marble. There are two chimneys on each side of the building and there are two brass poles on side going down to the respective apparatus room. Behind the sleeping quarters are the old hay storage areas not presently in use. There is a large sliding door on the engine side where a block and tackle was attached to a rail to hoist grain bags and bales of hay. Moving to the third floor one travels up a winding wooden staircase to the top level. There is considerable room by the use of a mansard roof and the detail of the wood structure can easily be seen. The third floor was once used as work area and recreation space. There does not appear to be any hose drying tower. There is brass poles to the second level and from the third level.

The exterior of the building is primarily brick. There is stone ornamentation over the bay doors and the second and third floors in front

The third floor was once used as work area and recreation space. There does not appear to be any hose drying tower. There is brass poles to the second level and from the third level.

The exterior of the building is primarily brick. There is stone ornamentation over the bay doors and the second and third floors in front

are decorated with bracketed wood fixtures. On the ground floor there are metal diamond shaped plates used to the front walls to the sides of the building. On either side of the bay doors are metal brick protectors made by the Washington Iron Works of Buffalo. The windows on the side toward Plymouth are ornamentated with stone lintels. The building has a classic mansard roof with slate shingles and the windows are dormered. In the rear of the building is a brick wall going from the back of the ladder company extending to Plymouth there is a small section of wall running southward from the corner and the wooden gates that connected the wall with the rear of the engine house have been removed. Originally there was a roof over the walled area of the storage of equipment.

There have been numerous alterations over the years. Some changes were the result of new innovations in fire fighting equipment. New doors were put in in the 1920's to accommodate larger apparatus. Repairs have been made to the roof on several occasions. With the loss of the horses minor changes took place to better use the space once occupied by the horses. Information on technical and architectural changes is very hard to come by.

**20. Unique house in Buffalo. Italianate Styling and use of cross gabled roof give house its individual distinction. Window sashes may have been changed in the 1880's to update it with the then fashionable Queen Anne Style. When the house was built, along with other large homes on the NW side of Jersey, it faced the Fargo Estate. The original owner, Adrian Root was born in Buffalo in 1833, son of Edward and Mary Root, his father being one of the early settlers of Buffalo. He served in the Civil War being Lieutenant-Colonel of the**

20 cont'd Second Regiment, the first Buffalo regiment recruited for service during the Civil War. Within a year in the service he was promoted to the position of Colonel of the Ninth New York Volunteers and later received the rank of Brigadier General. He left many Civil War relics to the Historical Society including swords and letters he had written to his mother during the war. Adrian Root also did great service during the Railroad Riots in Buffalo. A Mr. and Mrs. Edson Shoemaker lived here in 1879. He was proprietor of the Niagara Brewery, 128 Niagara Street, that dealt in ale, porter and lager beer. They had formerly lived at 77 Niagara Street. A brick five car garage was built behind the house around 1920 that connects the carriage house (c. 1870) with the main house.

20. The Missionera is an interesting church in terms of material and form. The wall material of course grey limestone is accented with red brick dress, an unusual reversal of roles for the two materials. The structure is built in elementary 13th century Gothic form, including a now vanished wooden steeple.

Following the Civil War the First Presbyterian Church administered several missions on the "outskirts" of the city, one being a frame chapel at the corner of Sixth (Busti) and Maryland. In May of 1875, the small chapel became the home of newly formed West Side Presbyterian Church. The original membership of the chapel was 33. The first pastor was the Reverend GG Smith. The first elders were William L. Doyle, Edward J. Hingston, the Reverend Herbert G. Lord, the present pastor, who was called the latter part of 1877. During 1881, the society bought a lot on the corner of Prospect Avenue and Jersey Street, upon which they subsequently erected a stone edifice worth nearly \$20,000. The building was dedicated Christmas day 1882. In 1925 the building was used for Romulus Club. In 1929 the structure served the Swedish Evangelical Mission Church.

(Indicate if building or structure is in an historic district)

**Among residential houses of Prospect Avenue. One block west of commercial Niagara Street.**

18. OTHER NOTABLE FEATURES OF BUILDING AND SITE (including interior features if known):

**Three story Stable. Flat roof. Corbelled frieze. Third floor has paired round arched windows, stone band and recessed brick panels with brick dentils. Second floor has paired flat headed windows with transoms, continuous stone lintel and sill and brick dentils. Center terra cotta panel is inscribed "Nassoy Bros. and Boarding and Livery Stable" with a carved horse head in relief and scroll and foliate relief pattern. First**

SIGNIFICANCE

19. DATE OF INITIAL CONSTRUCTION

**c. 1881**

ARCHITECT \_\_\_\_\_

BUILDER \_\_\_\_\_

20. HISTORICAL AND ARCHITECTURAL IMPORTANCE:

**18 cont'd floor has two large doors and brick corbelled pilasters.**

**20. Unique building in Buffalo being one of a few remaining boarding stables. In 1890, four brothers, Frank, Gilbert, Eugene and Henry Nassoy opened the Livery and Boarding Stable and did business there twenty-four years. They serviced the area residents by keeping buggies and riding horses, did shoeing and blacksmithing and even rented a custom funeral carriage. The business closed in 1914 because the automobile had drawn customers away.**
